

URBAN SCENERY SHADING WORKSHEET:

Use this worksheet to practice adding shadows to different parts of the illustration. Adding shadows will make the the wall, door, and trashcan look more three dimensional. Be sure to use a consistent light source when deciding where to add shadows.

THREE TECHNIQUES TO PRACTICE

- 1.) Contour shading along the right side of the trashcan.
- 2.) Scumbling along the top molding of the wall, around the door and around the outline of the building.
- 3.) Stipling around the corners of a number of different bricks (not all.)
